Skills

Languages Python · JavaScript · Swift · Rust · Javascript · Java · SQL

Developer Tools Docker · Django · Postgres · Flask · MySQL · Git · Fast API

Frameworks NodeJS · React · OpenAI · GraphQL · AWS · MCP · AI/ML · MongoDB

Education

University of Waterloo

Candidate for Bachelor of Mathematics, Data Science

Sep. 2021 – Apr. 2026

Waterloo, ON

Internships

David AI

Software Engineer

Jan. – Apr. 2026

San Francisco, CA

- Built internal machine-transcription pipeline combining multiple speech-to-text models to generate world class transcripts
- Designed transcription data model to normalize utterances, timestamps, and provider metadata across transcription engines
- Developed audio flags to detect interjections across the audio collection, improving F1 score from 55% to 91%

Bloomberg

Software Engineer

Sep. – Dec. 2025

New York City, NY

- Led development of mcp.bloomberg.com, enabling Blackstone to be the first customer using Bloomberg MCPs
- Productionized an MCP server hosting Bloomberg API documentation, exposing endpoints, schemas, and example payloads
- Implemented the MCP OAuth 2.1 flow with support for Authorization Server Metadata (RFC 8414) for all Bloomberg APIs

Databricks

Software Engineer

May. – Aug. 2025

Mountain View, CA

- Developed a Python-based validation layer for GraphQL requests, enhancing internal API security and access controls
- Optimized CI tooling for large-scale monorepos using Bazel and custom Python scripts, reducing build failures by 30%
- Built infrastructure using MCPs with OpenAI and Claude to support telemetry for product-facing services across teams

Pinterest

Software Engineer

Sep. – Dec. 2024

Toronto, ON

- Engineered new 'Brand Values' filter on product search using React and JavaScript, increasing shopping sessions by 5%
- Built an automated Swift workflow to ensure brand value data on the Pins is fresh and indexed every 24 hours
- Refactored shopping search services using Django, optimizing API response times and enhancing backend scalability

Okta

Software Engineer

May. – Aug. 2024

Toronto, ON

- Engineered an admin recovery feature for the Desktop MFA product, allowing secure administrator access on MacOS devices
- Used Swift to design a sign-on feature using OAuth protocols, enhancing secure access on desktop devices by 30%

Faire

Software Engineer

Jan. – Apr. 2024

Toronto, ON

- Led development in the launch of the new Evergreen Gifts category, increasing dollars ordered on homepage by \$200,000
- Integrated Python tagging feature for gift products, allowing non-engineers to streamline product categorization

Cognition

Software Engineer

Sep. 2022 – Aug. 2023

Toronto, ON

- Developed a AWS Kinesis data pipeline to pipe BCI signal data in real-time, allowing for shorter development cycles
- Implemented a CI/CD pipeline using Jenkins, automating deployment processes and reducing release times by 40%

Startup Projects

🔗 AI Resume Builder (iOS & Android) App | Python, Swift, Flutter, RevenueCat SDK

- Led a team of 14 members, including developers, UX designers, and a marketing team in the development of an AI-powered resume builder deployed on the [Play Store](#) and [App Store](#) with **70,000+ downloads** since release
- Integrated RevenueCat SDK to incorporate in-app purchases, resulting in **\$20,000+** in subscription revenue since launch

🔗 Phone Automation for Restaurants (video demo) | Twilio, Retell AI, Typescript, React, Postgres, MySQL

- Engineered an AI-driven phone assistant, "Talk & Order," to automate phone orders for restaurants enabling orders to be placed directly into the restaurant's POS system for a completely human-free call-to-order experience
- Developed a Twilio call system capable of handling simultaneous calls in real-time, ensuring no missed sales for restaurants
